professional experience

2021-Present

ENGINEER / *Indiana Health University / Indianapolis, IN*

- Built and deployed virtual machines in VMware with Microsoft, Linux or other operating systems
- Promptly assessed the performance of healthcare servers by deploying scripts and swiftly provided troubleshooting support to application owners
- Participated in on-call procedures every 10 weeks for a one-week period
- Documented all systems and applications for new and existing team members

2019-2021

WEB DEVELOPER / *Wireless Network and Communication Research Center / Chicago, IL*

- Built and designed the center's website using front-end technologies
- Created a database for real-time data access using SQL
- Converted existing H5 files from servers into Python files for data visualization
- Participated in weekly SCRUM-like meetings to present progress and receive consistent feedback from the head of research
